

TELEHEALTH CONSENT STATEMENT

Telehealth involves the communication of the patient's medical information, both orally and visually, to their health care practitioners and the laws of confidentiality apply to today's visit. The clinical team will respect the patient's privacy. To assist in this, we ask that no recording or screen capture of any kind be done during the visit today. Telehealth may not be able to replace a traditional office visit, and while the team will strive to treat the patient's condition, they may need to refer the patient to a medical provider who can provide additional services.

- Patient verbally agreed to the aforementioned statement
- Patient is at home, alone, and here in Washington state
- Telehealth visit conducted securely via Zoom meeting
